THE VOCABULARY PROFILE OF THE STUDENTS' THESES AT THE ENGLISH LANGUAGE EDUCATION PROGRAM

Nova Suciyaniti

Satya Wacana Christian University

ABSTRACT

Vocabulary is an important part in any language. Therefore, as a foreign language in Indonesia, English vocabulary should be taught to the students. The aim of this study was to profile the vocabulary of students' theses at English Language Education Program at the Faculty of Language and Literature, Satya Wacana Christian University. Based on the purpose, the descriptive method was used and five theses completed by the students of 2007, 2008, 2009, 2010, and 2011 at the English Language Education Program at Faculty of Language and Literature. The data for this study were collected from Repository.uksw.edu. The data were analyzed through a computer program *Vocabprofiler*. The revealed four results; (1) the frequency of K-1 was 78.31%, K-2 was 6.42%, AWL was 8.44%; (2) the negative vocabulary profile of the students' theses was 35.27% in K-1, 78.87% in K-2, and 49.74% in AWL; (3) block frequency output of off-list words; (4) the comparison of vocabulary frequency levels of the students' theses with significant differences AWL between student' thesis of 2008 and student' thesis 2009.

Key words: *vocabulary, vocabulary profile, Academic Word List*

INTRODUCTION

Thesis writing is one of a requirement for the students in SatyaWacana Christian University to pass their degree program to get the Sarjana degree. This also applies to the students who take English Language Education Program (ELEP) at Faculty of Language and Literature, Satya Wacana Christian University. A thesis consists of an argument or a series of arguments that combined with

descriptions and discussions of research that students have undertaken (Viete, Chowdhury, Podorova, Barnes, & March, 2014). In ELEP, the students write theses on current issues about the problems in teaching English as a foreign language. The students should conduct the research based on the topic that they determine with a general topic such as teaching, linguistics or literature. As the requirement before the students finish the study, writing a theses is not easy. The students need much time to finish it and very often they have difficulties during the writing of the theses.

There are several difficulties in a writing of theses. According to Wenkang (2004) the difficulties of the students' experienced in theses writing depend on whether the students acquired any knowledge or skills to complete their theses. The difficulties in writing theses may relate to the sources, literature review, and the previous study not relevant according to the supervisor's view. In this case, the students and the supervisors may have different view toward the students' topic. Besides, the students should understand the meaning of the sources and understand the contents of the articles or journal that they read. Furthermore, unfamiliar words in a journal sources can make the students unable to understand the contents of text. In other hand, the difficulty in writing theses is generally about grammatical structure. In addition, word choice also becomes difficulties during writing the theses. Therefore, the knowledge of vocabulary is an important aspect during writing theses.

The purpose of this research is to profile the vocabulary used in the students' theses at ELEP. The main of research questions have been formulated as 'what is the

vocabulary profile of the students' theses at English Language Education Program at Faculty of Language and Literature, Satya Wacana Christian University?'The significance of this profiling is for the students and teacher. For the students, the findings could increase their vocabulary knowledge especially academic vocabulary supposed to understand the meaning of some sources while writing thesis. For the teacher, the findings could be used as references to teach the vocabulary to the students in theses writing.

LITERATURE REVIEW

In this Literature review I will start by explaining vocabulary in writing, vocabulary in academic writing, developing vocabulary knowledge, vocabulary profile as a tool to analyse vocabulary, the use of vocabulary profile, and previous studies about vocabulary profile.

Vocabulary in writing

Vocabulary is an important part in any language. In other words, vocabulary is a central part of a language (Coxhead, 2006). Vocabulary is a significant predictor of overall reading comprehension (Baumann, Kame 'enui, & Ash, 2003, cited in Fisher & Frey, 2014) and student performance (Stahl & Fairbanks, 1986, cited in Fisher & Frey, 2014). In other words, vocabulary is part of complex network of knowledge that draws on students' understanding of the alphabetic, syntax, and semantics of language (Fisher & Frey, 2014). In that case the students should know

the vocabulary well, so that they can communicate in a wide variety of circumstances (Coxhead, 2006). Without vocabulary, the language does not have meaning and purpose.

Word is part of vocabulary that should understand during writing. Before using specific vocabulary, students need to understand the meaning of the words (Coxhead, 2006). In other hand, words that considered as the basic vocabulary is called high-frequency vocabulary, which appear more frequently than the others (Coxhead, 2006). Besides, there are many aspects of a word that students need to know. Based on Coxhead (2006) those aspects are meaning, pronunciation, grammar, word families, and collocation. In addition, understanding vocabulary is very important in writing. If the students have lack understanding about vocabulary, it will make them have difficulties to improve their writing.

This is a way to help the students who have lack of vocabulary knowledge used in writing. According to Nation (1990) stated the things that the students need to do to help them when they lack vocabulary in writing are using spelling and sound pattern, using vocabulary in sentences, using reading to help writing, using a dictionary, and using schematically related vocabulary. In addition, the second language learners can increase their vocabulary by around 1000 words a year to match native speakers' vocabulary growth. So, students should understand all aspects before the students study the academic vocabulary.

Vocabulary in academic writing

Understanding academic vocabulary is important to develop academic writing. Coxhead (2006) stated that there are several key reasons why academic vocabulary is important to learners. To be successful at university, the students need to be able to show that they can read, understand and respond clearly in writing using academic language and concepts. In academic writing, students need to develop academic writing skills, especially in college-level. Therefore, writing programs should have a clear picture of the types of writing and written discourse expected of the students. Students should dedicate time and resources to procedure written academic discourse and text during their degree program (Hinkel, 2004). Students need to recognise and use words that occur regularly in academic texts.

Vocabulary is a very important part of literacy. Students will meet general academic words regularly in their academic reading, and these words occur in wide variety of subject areas. In this case the students have to struggle to face the difficulties through the vocabulary of content area learning (Carnegie Council on Advancing Adolescent Literacy, 2010, cited in Flanigan, Templeton & Hayes, 2012).

Academic writing assignment can help students to develop their writing. According to Hinkel (2004) the most important characteristic of academic writing are demonstrating command of standard written English (grammar, phrasing, effective sentence structure, spelling, and punctuation). Besides, Hinkel (2004) also stated that

the most common written academic assignment and tasks are major writing assignments, medium-length essays and short written tasks, and English composition writing tasks. Furthermore, there are several types of writing for the assignment in-class or out-of-class, such as exposition, cause-effect interpretation, classification, comparison/contrast, analysis, and argumentation (Hinkel, 2004). Through the assignment that the students get in writing class, they will develop their knowledge about the academic words in academic writing. It also makes them easier to write text with academic purposes to make the students more focus to the meaning of words in writing.

Developing vocabulary knowledge

There are several ways to develop vocabulary knowledge. The first one is reading. According to Nation (1990) the students of English as a foreign language usually begin their reading with specially simplified texts. He also stated that the learners who lack vocabulary should read the texts through vocabulary exercises, learning word in isolation, simplified reading, intensive reading of un-simplified texts, and semantic mapping. In addition, there are approaches in reading such as purposeful reading, scanning, skimming, information word, phrase reading, analytical reading, marking the text, note-taking, managing vocabulary, and reading with others. Using the approaches in reading, the students will be able to understand the meaning and the purposes of the text. During reading, the students can master 2000 to 3000 words of general useful words in English. It wise to direct the student's vocabulary

learning in more specific area through learning shared vocabulary of several fields of (Nation, 1990).

Writing is another way to improve vocabulary knowledge. First of all introducing vocabulary as well as in the structured language practice activities that can develop sentences to become structured language practice is needed before students come up to the lesson (Donnelly & Roe, 2010). There are two sets to develop sentences frame. The first set is using familiar vocabulary before writing lesson with the students who may not be familiar with the English language necessary to express compare/contrast statement. The second set is use the main lesson and merge of the academic language that selected from the text (Donnelly & Roe, 2010).

The third way to develop vocabulary knowledge is speaking. Through communication skill in speaking can influence developing vocabulary by understanding the meaning of words when communicate. By being exposed the situations where the emphasis is using the speaker on resources for communicating meaning as efficiently and economically as possible (Littlewood, 2006). So, the speaker makes conscious decisions about the message that the speaker wants to convey. In addition, Luoma (2004) stated that the most important point to remember from the linguistic description of spoken language is the special nature of spoken grammar and spoken vocabulary. Therefore, by choosing words and vocabulary in communicating with each other, the topic or issue were delivered and become the vocabulary learning to develop the vocabulary knowledge.

The fourth way to develop vocabulary knowledge is listening. Listening has close connection with speaking. According to Buck (2001) listening is the result of an interaction between information sources are details of the context, general world knowledge, and so forth. The listeners use whatever information available, or whatever information seems relevant to help the listener interpret what the speaker is saying. Through listening what the speaker says, the students can devise the meaning of the statement that the speakers' speak. To develop the vocabulary knowledge, reading, speaking, and listening have definite connection.

Vocabulary Profiler as a tool to analyse vocabulary

Vocabulary profiler is a tool used to analyse vocabulary profile in a text. The vocabulary profiler categorizes word into 1000 most frequency word families (K1), 2nd 1000 most frequency word families (K2), the Academic Word List (AWL), and off list word. With the categories, the students know what vocabulary they should learn. Besides, the categories of words would benefit teachers what words to teach to the students.

The vocabulary profiler is very useful in language education. With the categories of vocabulary profile, the teachers and the students are more directed when teaching and learning vocabulary. According to Coxhead (2006), based on the computer program have known some word appear frequently than others. So, there are the ones should try to teach first or choosing the high-frequency to work on in classroom or highlighting words in passage or focusing in writing. From this vocab

profiler analysis, teachers can choose which one the suitable vocabulary to teach accordance with the level of students. In addition, by a vocabulary profile, it is meant that the frequency of each vocabulary item is to calculate from a reference amount covering the language variety of the target situation (Yoon, Bhat, & Zechner, 2012). In other hand, the vocabulary profile can be the reference to help the students increase their vocabulary knowledge. Moreover, vocabulary profiles offer good potential as predictors of the academic performance of TESL students if used in conjunction with more traditional forms of entrance assessment, such as interviews, academic records, and tests of grammatical knowledge (Morris & Cobb, 2003).

Previous Studies

The previous study conducted by Trifosa (2014) entitled 'Vocabulary Profile of IC (Integrated Course) Books Used in English Teacher Education Program of SatyaWacana Christian University' had examined the vocabulary profile of IC (Integrated Course) books used in English Language Education Program, SatyaWacana Christian University to help the lectures during teaching, especially teaching vocabulary. IC books contain kinds of materials and exercises like reading, writing, etc. This research had result, the average of K-1 in book 1 was 81.46% and in book 2 was 83.93%, K-2 in book 1 was 7.54% and in book 2 was 7.12%. The AWL in book 1 was 2.1% and in book 2 was 1.72%. The Off-List Word in book 1 was 8.94% and book 2 was 7.11%. This result could conclude that the information on vocabulary profile was important to help the lectures in checking material that would

be given to the students and good to help the lectures in giving appropriate vocabulary exercises, assignment, and any other activities by knowing the difficulty level of the vocabulary.

The other the previous study conducted by Ardyny (2014) entitled 'Vocabulary Profile of Introduction to Language Education Textbook'. This study had purpose to identify the vocabulary profile of material in the Introduction to Language Education course. The result of this study showed 80.81% of the course book was understandable for university level while the rest of 19.19% was need much effort to comprehend; unit 1 of the course book could be relatively easy to comprehend because it had the highest proportion of 1000 word list (K1) and the lowest proportion of Academic Word List (AWL), while unit 5 could be hard to comprehend because of its lowest proportion of K1 and its highest proportion of AWL; (3) unit 7 did not show the contrastive result of K1 and AWL however it still concluded as unit which was hard to comprehend. From this study could conclude that teachers should be more aware with the words contained in the course book so that they can decide the choice of words in creating materials for the students. In my study will conduct the study of vocabulary profile of the students' thesis that has not been researched before, especially at English Education Program at the Faculty of Language and Literature, Satya Wacana Christian University.

THE STUDY

Context of the study

The study took place at the Faculty of Language and Literature (FLL), Satya Wacana Christian University (SWCU). To be specific, the study took place in the university library where the completed students' theses that got Sarjana Degree that have been stored.

Method of the research

This study used a descriptive method to analyse the data. According to Rivera (2007), descriptive method is used to discover the facts which involve description, recording, analysis, and interpretation of the data. In this study, I described the vocabulary by profile of the ELEP students' theses.

Samples

The samples for this study were selected from the theses completed by the students of 2007, 2008, 2009, 2010, and 2011 academic years. This was 1 thesis selected randomly from each group. So, in this study, I analysed 5 complete theses by the students. All fields in the theses completed by the students of 2007, 2008, 2009, 2010, and 2011 were selected.

Research Instrument

This study used the vocabulary profiler as a tool to analyse the vocabulary in the theses. The vocabulary profiler was used to measure the proportion of low-frequency

vs high-frequency words in the students' theses by means of the computer program *Vocabprofile*. According to Bardel & Lindqvist(2011), the vocabulary profile will contain K1 words (1-1000), K2 words (1001-2000), Academic Words List (AWL), and Off-List words. This study used the vocabulary profiler as a tool to analyse the vocabulary in the theses with four categories of frequencies.

Data Collection Procedure

Selecting the students' theses was the first step to collect the data. I went to the library and asked the librarian to get permission to borrow the soft file of the theses. The data were collected from library's website (*Repository.uksw.edu*). The completed theses of the students were stored in *Repository.uksw.edu*. The theses of 2007, 2008, 2009, 2010, and 2011 academic years were selected and downloaded randomly from this website. After that, I copied all the contents of the students' theses from PDF file to the document file. The analysis started from introduction up to conclusion without name of person, name of place, number and punctuation.

Data Analysis

To analyse the data, I used the computer program available at www.lextutor.ca/vp. The first step was to open www.lextutor.ca/vp then chose *vocabprofile*. The next step was to select VP classic. The next step was to copy the soft file of the students' theses which had been saved in Microsoft WordDocument. The next step was to select *submit window* to produce the output.

FINDINGS AND DISCUSSION

The first part of this section presents the overall vocabulary profile of the students' theses showing the proportions of the vocabulary frequency classifications. The second part shows the negative vocabulary profiles of K-1, K-2, K-3 (AWL) with lists of the vocabulary items that were not found in the students' theses. The last part of this section shows the comparison of the students' theses with regard to the vocabulary items that were shared and unique in each of the students' theses. The comparison also shows the token recycling index that provides information about an estimate of the students' theses comprehensibility.

A. Over All Vocabulary Profile on the students' theses

Table 1. Overall vocabulary profile of the students' theses

	FAMILIES	TYPES	TOKENS	CUMULATIVE
K-1 WORDS	630	1217	23607	78.31%
	54.83%	45.89%	78.31%	
K-2 WORDS	230	378	1935	84.73%
	20.02%	14.25%	6.42%	
AWL	289	540	2543	93.17%
	25.15%	20.36%	8.44%	
OFF-LIST	?	517	2061	100%
		19.50%	6.84%	
TOTAL	1149+?	2652	30146	
		100%	100%	

As shown in Table 1, the first row shows three terms; *family*, *type* and token. *Word family* is head word, for example: the family or head word of *classification* and *classified* is *classify*. *Type* is different words, for example: *modality* and *capability* are different words. While *classification*, *classified*, *classifying* are considered as the same *type*. *Token* is words in a text; the total number of words in a text. For example, if in a text there are *classify* [2], *describe* [6], *development* [3], and *studying* [5], the number of token is 16.

Table 1 shows the most frequently used 1000 words group or K-1 was 78.31%, more than two-third of the vocabulary used in the students' theses. With the additional K-2 word coverage (6.42%) the cumulative percentage of the word coverage was 84.73%. This is below a good estimate for good comprehension of reading theses. According to Hirsch (2003), an understanding of 90-95% of the words is necessary for good comprehension. Based on the data in Table 1, this word knowledge band should include knowledge of academic words as much as 8.44%. Academic words are those words which are commonly used in academic texts. We need to question whether the proportion the academic words that amounted to 2543 words used in the students' theses is sufficient for thesis writing. Another point that is worth considering is the number of off-list words that reached 30146 words. Although this off-list category is excluded from the frequency list and may occur infrequently (low frequency words), it may have words that students' need for writing theses. This low frequency list should not be ignored and theses students have to

make a selection for useful words in this category. According to Laufer and Alderson (2007) students need at least all the 3,000 level words to write for academic purpose.

B. Negative vocabulary profiles of the students' theses

The second section presents the description of negative vocabulary profiles of the students' theses. Negative vocabulary is vocabulary items that are not found in the students' theses. These missing words are derived from differences of words in the New General Word List and words in the students' theses used in this study. The list of negative K-1 words below is useful for students in selecting vocabulary items that they may find useful for these writings. From this list, the teachers may see on the negative VP to teach appropriate vocabulary to the students except the vocabulary that occurs in the vocabulary profile.

Negative VP of K-1

The following analysis shows all the word families (=head words) from the K-1 level that were not found in the students' theses. The summary of negative vocabulary profile for K-1 level is presented below.

K-1 Total word families: 964

K-1 families in input: 625 (64.83%)

K-1 families not in input: 340 (35.27%)

These percentages do not refer to tokens or number of words in the students' theses but rather number of word families. As can be seen in the summary, as much as 64.83%

of word families were found in the students' theses, which means, as much as 35.27% of word families were 'missing' or not found based on the words listed in New General Service List (NGSL). The followings are some of the word families that are not found in the input students' theses. The complete word list has been put in Appendix A

ACCOUNTABLE	ARM	BEHIND	BUSINESS
ACROSS	ARMY	BENEATH	BROAD
ACTOR	ARRIVE	BILL	BURN
ACTRESS	ATTACK	BLACK	BUY
AFFAIR	BALL	BLOW	CAPITAL
AGAINST	BANK	BOAT	CAR
AGENT	BAR	BOY	CASTLE
AGO	BATTLE	BRANCH	CATCH
ANCIENT	BEAUTY	BRIDGE	CHIEF
ARISE	BED	BRIGHT	CHURCH
ETC.....			

Negative VP of K-2

This analysis shows all the word families (=head words) from the K-2 level that were not found in the input texts.

K-2 Total word families: 986

K-2 families in input: 229 (23.23%)

K-2 families not in input: 758 (78.87%)

These percentages do not focus on tokens or number of words in the students' theses but rather number of word families. As shown in the summary, as much as 23.23% of word families were found in the students' theses, which means, as much as 78.87% of word families were 'missing' or not found based on the words listed. The followings are some of the word families (K-2) that were not found in the students' theses. The complete word list has been put in Appendix B.

ABROAD	ACHE	ALIKE	APPLAUD
ABSENCE	ADMIRE	ALIVE	APOLOGIZE
ABSENT	ADVERTISE	ALoud	APOLOGY
ABSOLUTE	AEROPLANE	ALTOGETHER	APPLAUSE
ABSOLUTELY	AFFORD	AMBITION	APPLE
ACCIDENT	AFTERNOON	AMUSE	APPROVE
ACCUSE	AHEAD	ANGLE	ARCH
ACCUStOM	AIRPLANE	ANXIETY	ARREST

ETC.....

Negative VP of K-3 or AWL

This analysis shows all the word families (=head words) from the K-3 level that were not found in the input students' theses. These percentages do not refer to tokens or number of words in the students' theses texts but rather number of word families. As can be seen the summary, as much as 50.44% of word families were found in the students' theses texts, which means, as much as 49.74% of word families were 'missing' or not found based on the words listed in New General Service List (NGSL).

K-3 Total word families: 569

K-3 families in input: 287 (50.44%)

K-3 families not in input: 283 (49.74%)

The followings are some of the word families that were not found in the input text.

The complete word list has been put in Appendix C.

ABANDON	APPRECIATE	AUTOMATE	CIVIL
ADJACENT	ARBITRARY	BEHALF	CLASSIC
ADMINISTRATE	ASSEMBLE	BIAS	CLAUSE
ADVOCATE	ASSESS	BOND	COHERENT
AGGREGATE	ASSIST	BRIEF	COINCIDE
AID	ASSURE	BULK	COLLAPSE

ALBEIT	ATTACH	CAPACITY	COMMENCE
ALLOCATE	ATTAIN	CEASE	COMMISSION
AMEND	AUTHOR	CHANNEL	COMMIT
ANNUAL	AUTHORITY	CHEMICAL	COMMODITY
ETC.....			

These academic words families may contain techical words that students need in writing theses. By learning the ‘missing’ AWL the students can develop their vocabulary, especially for academic purposes. According to Kinsella (2006) these academic words are likely to be useful for theses students.

The knowledge about AWL will help the students in academic studies. According to Coxhead (1998) knowledge of academic vocabulary is vital for students studying English as a foreign language, particularly writing. Academic words are the important words used in writing which have academic pupose. So, the AWL is the most important words that used in writing which have academic pupose, especialy in writing thesis.

C. Block frequency output of off-list words.

The following words fall under the category of ‘Off-list’; words not listed under any three frequency categories. Using the tool in the Vocabulary Profiler, these words have been frequency-blocked per ten words and have been arranged from high

to low frequency. This list of words may provide supervisors with useful information as to what words are necessary for these students. In other words, supervisors may select words from the list that are relevant to guide these students at the faculty. Below is the list of 'Off-list' words, with 2061 tokens and 517 types. Note that *RANK* is ranking of word, *FREQ* is frequency of word occurrence, *COVERAGE* is the percentage of word occurrences, individual or cumulative, and the last column is the vocabulary item/word. The complete list of blocked frequency has been put in Appendix D.

Table 2. Block frequency output of off-list words

RANK	FREQ	COVERAGE		WORD
		individ	cumulative	
1.	158	7.67%	7.67%	FEEDBACK
2.	93	4.51%	12.18%	CLASSROOM
3.	91	4.42%	16.60%	MODAL
4.	87	4.22%	20.82%	TRANSLATOR
5.	80	3.88%	24.70%	INDONESIAN
6.	62	3.01%	27.71%	ORAL
7.	55	2.67%	30.38%	COMICS
8.	54	2.62%	33.00%	COMIC
9.	38	1.84%	34.84%	INTERVIEW
10.	34	1.65%	36.49%	MODULATION
11.	33	1.60%	38.09%	EXCERPT
12.	26	1.26%	39.35%	RECAST
13.	21	1.02%	40.37%	METALINGUISTIC

14.	21	1.02%	41.39%	MODALS
15.	19	0.92%	42.31%	INDONESIA
16.	18	0.87%	43.18%	COUPLETS
17.	18	0.87%	44.05%	LITERAL
18.	17	0.82%	44.87%	JUNIOR
19.	15	0.73%	45.60%	DISCOURAGED
20.	15	0.73%	46.33%	SYNONYMY

D. Comparison of Vocabulary frequency levels of the students' theses

Table 3 below compares the frequency of K-1, K-2, AWL, and Off-list among the students' theses texts. It provides a general picture of the extent to which the students' theses differed with regards to their frequency groups.

Table 3. Comparison of word frequency levels of students' theses

	K-1 Words %	K-2 Words %	AWL %	Off-List %
<i>Angkatan 2007</i>	76.77	7.12	9.84	6.27
Cumulative %	76.77	83.89	93.73	100
<i>Angkatan 2008</i>	88.12	4.36	4.24	3.28
Cumulative %	88.12	92.48	96.72	100
<i>Angkatan 2009</i>	80.46	3.85	10.47	5.22
Cumulative %	80.46	84.31	94.78	100
<i>Angkatan 2010</i>	75.64	5.82	9.05	9.49
Cumulative %	75.64	81.46	90.51	100
<i>Angkatan 2011</i>	71.72	9.46	9.37	9.45
Cumulative %	71.72	81.18	90.55	100

As displayed in the Table 3, it appears that in general, the differences of K-1, K-2, AWL, and Off-list words among the students' theses were not very significant as the differences were very small between the students of 2007, 2008, 2009, 2010, and 2011 academic years. The differences of Academic Word List (AWL) were very significant between the students' theses of 2008 academic years (4.24%) and the students' theses of 2009 academic years (10.47%). Whereas, students' theses of 2007 (9.84%), 2010 (9.05%), and 2011 (9.37%) have relatively similar proportion of Academic Word List (AWL). However, if we consider the inclusion of AWL groups in writing theses, we should expect that the students should master AWL words because those words are commonly used in academic texts such as theses.

Text comparison of the students' theses

Comparison of students' theses 2008 and students' theses 2009

The comparison is between students' 2008 thesis and 2009 thesis based on differences of Academic Words List (AWL) used. The analysis of comparison shows that the token recycling index was 83.88%, indicating that as much as 83.88% of words in the students' theses of 2008 academic years and the students' theses of 2009 academic years were similar (shared). Thus, new or unique words in students' theses of 2008 and 2009 academic years were 53.72% (families recycling index). The shared as well as unique words are displayed in the Table 4 below. The figure next to a word is the occurrences or frequency of that word in the students' theses. The complete table has been put in Appendix E.

Table 3. Shared and Unique words students' theses of 2008 academic years and students' theses of 2009.

TOKEN Recycling Index: (4782 repeated tokens: 5701 tokens in new text) = 83.88%

FAMILIES Recycling Index: (375 repeated families: 698 families in new text) = 53.72%

<u>Unique to first</u> 690 tokens 249 families	<u>Shared</u> 4782 tokens 375 families	<u>Unique to second</u> 919 tokens 323 families

		034. achieve 5	034. bit 1
		035. clean 5	035. blame 2

As shown in Table 4, it appears the unique words in the student thesis of 2008 as the first text with 690 tokens and 249 words. In the second column shows the shared word in both the student thesis of 2008 and the student thesis of 2009. This shared have 4782 tokens and 375 families words. The last column appears the unique to second (the student thesis 2009) in 919 tokens and 323 families. In addition, in this table also shows the same list words of both the student thesis 2008 and the student thesis 2009.

CONCLUSION

This study aims to identify the vocabulary profile of the students' theses at English Language Education Program at Faculty of Language and Literature, SatyaWacana Christian University. This study shows list of vocabulary in the

students' theses and to produce the token(word) recycling index of the students' theses. The *vocabprofile* of the students' theses shows percentages of the frequency groups; 78.31% in K-1; 6.42% (K-2); 8.44% (AWL); and 6.84% (Off-Listword). The second finding was about the negative vocabulary profiles in the students' theses 35.27% of K-1; 78.87% of K-2; and 49.74% of AWL group that families not in input. This study also has shown the comparison of AWL between the students' theses of 2007, 2008, 2009, 2010, and 2011 academic years with 9.84% in the student thesis of 2007; 4.24% in the student thesis of 2008; 10.47% in the student thesis of 2009; 9.05% in the student thesis of 2010; and 9.37 in the student thesis of 2011.

This study has produced results that indicate the vocabulary profile that focus on frequency classification of K-1 and K-2 words used in the students' theses negative VP profiles, AWL families, and the block frequency output of off-list words. From this result, it can help students to improve their vocabulary knowledge. Therefore, this result becomes the reference for the teacher to suggest vocabulary used in thesis. However, in the teaching vocabulary, teacher does not only focus on vocabulary that appears in K-1 and K-2, but also pay attention to the vocabulary that appears in negative VP and off-list word.

This study is far from perfect. There are some limitations in this research. First, the findings of this study are very contextual of vocabulary. The result gives more specific categories of vocabulary based on vocabulary profiler analysis. The vocabulary profile of students' theses in this study cannot be generalized to other

context of vocabulary profile. Last, this research only focuses on the vocabulary profile of the students' theses. For further study, it suggested to conduct a research on the N-Gram Phrase Extractor of vocabulary used in the students' theses that pull out the recurring word strings up to and including the length of words' specify that have not conduct in English Language Education Program yet.

ACKNOWLEDGEMENTS

All the highest praises and gratitude is due to Allah SWT for blessing me with time, ability and strength to finish this thesis. I am very grateful to my supervisor, Prof. Dr. Gusti Astika, M. A. for his time, guidance, support, suggestions, and patience in every process of finishing my thesis. I also would like to extend my gratitude to my second reader Ibu Anne I. Timotius, M. Ed for the time reading and marking this thesis. Thank you for Pak Hari that give me information when find out all the theses. Thanks a lot to my beloved family, Bapak Moko Mugiyanto, Ibu Tasminah, and my brother Amaris Bagas Cahyanto for supporting and praying for me all the time. Firsta, Retri and Luky, thank you for your support and encouragement to finish this thesis. The last but not least, thank you so much to my beloved boy Andy Sinyo for your patience, support and prayer. I love you all!

APPENDICES

Appendix A

Negative VP of K-1

Summary:

1k Total word families: 964

1k families in input: 625 (64.83%)

1k families not in input: 340 (35.27%)

Note: These percentages do not refer to tokens in text but rather number of families.

This analysis applies only to standard list items NOT any recategorized proper nouns

Appendix B

Negative VP of K-2

Summary:

2k Total word families: 986
 2k families in input: 229 (23.23%)
 2k families not in input: 758 (76.88%)

Note: These percentages do not refer to tokens in text but rather number of families.

This analysis applies only to standard list items NOT any recategorized proper nouns

2k complete: Found headwords <u>underlined</u>	<u>2k head-</u> <u>words found</u>	<u>2k head-</u> <u>words not found</u>
1. ABROAD	1.	1. ABROAD
2. ABSENCE	2.	2. ABSENCE
3. ABSENT	3.	3. ABSENT
4. ABSOLUTE	4.	4. ABSOLUTE
5. ABSOLUTELY	5.	5. ABSOLUTELY
6. ACCIDENT	6.	6. ACCIDENT
7. ACCUSE	7.	7. ACCUSE
8. ACCUSTOM	8.	8. ACCUSTOM
9. ACHE	9.	9. ACHE
10. ADMIRE	10.	10. ADMIRE
11. ADVERTISE	11.	11. ADVERTISE
12. <u>ADVICE</u>	12. ADVICE	12.
13. AEROPLANE	13.	13. AEROPLANE
14. AFFORD	14.	14. AFFORD
15. <u>AFRAID</u>	15. AFRAID	15.
16. AFTERNOON	16.	16. AFTERNOON
17. <u>AGRICULTURE</u>	17. AGRICULTURE	17.
18. AHEAD	18.	18. AHEAD
19. <u>AIM</u>	19. AIM	19.
20. AIRPLANE	20.	20. AIRPLANE
21. ALIKE	21.	21. ALIKE
22. ALIVE	22.	22. ALIVE
23. ALOUD	23.	23. ALOUD
24. ALTOGETHER	24.	24. ALTOGETHER
25. AMBITION	25.	25. AMBITION
26. AMUSE	26.	26. AMUSE
27. <u>ANGER</u>	27. ANGER	27.
28. ANGLE	28.	28. ANGLE
29. <u>ANNOY</u>	29. ANNOY	29.
30. ANXIETY	30.	30. ANXIETY
31. <u>APART</u>	31. APART	31.
32. APOLOGIZE	32.	32. APOLOGIZE
33. APOLOGY	33.	33. APOLOGY
34. APPLAUD	34.	34. APPLAUD

35.	APPLAUSE	35.		35.	APPLAUSE
36.	APPLE	36.		36.	APPLE

Appendix C

Negative VP of K-3 or AWL

Summary:

AWL Total word families: 569
 AWL families in input: 287 (50.44%)
 AWL families not in input: 283 (49.74%)

Note: These percentages do not refer to tokens in text but rather number of families.
 This analysis applies only to standard list items NOT any recategorized proper nouns

AWL complete: Found headwords <u>underlined</u>	<u>AWL head- words found</u>	<u>AWL head- words not found</u>
